Justification for Equipment Replacement Fund Expenditure

This equipment is used to protect critical infrastructure switches in data closets throughout the organization. UPS devices that are being replaced are at least 5 years old. At this age the internal batteries begin to fail with the potential for the batteries to corrode or explode.

How will this improve our service level and efficiency?

UPS devices are critical in protecting valuable City assets, keeping the City network operating optimally. Typically, equipment damaged without a UPS is worth 3x the amount of the UPS itself.
