Justification for Equipment Replacement Fund Expenditure

The Department is requesting funding for 2022 to install new digital security cameras at Fire Stations 2 and 5 to replace obsolete analog equipment. Station #5 will also need to have Cat 6 data cable and a Cat 6 patch panel installed in order to fully upgrade the system. This Cat 6 cable and componets will match the exisiting City of Waukesha standards. The current analog cameras are nearing the end of their service life and are not fully functional, due to age. All these cameras will be on the same operating platform which has been established as a standard for the City.

How will this improve our service level and efficiency?

The replacement of this equipment will allow the Department to comply with open records requirements and allow all video feeds from our cameras to be viewable by the Police Department. Past video images from our camera systems have been used for accident investigations, internal investigations, and to assist law enforcement with criminal and civil investigations.
