Good morning,

I have another flat tire that is not reparable. I'm told it is another lag bolt that caused the flat. I will need to purchase another tire and will be requesting reimbursement.

Thank you,
Briana

I determined the nails were from the resurfacing project because of the constant construction and debris that were constantly left in the entrance of my driveway. Each time I would exit and renter, there was some sort of debris that was in the way that I later realized I had run over.

Dear Ms. Monsivais –

Your claim for tire damage came to me for review. You state in your claim that two of your tires were punctured "due to the resurfacing project taking place outside my residence over the last several months." The Tires Plus invoice indicates that the tires both had nails in them.

We will evaluate your claim fairly, but we'll need some more information to do so. Please explain how you were able to determine that the nails in your tires were the result of the resurfacing project. Give us whatever information you have that shows that the nails in your tires are the result of the city's acts or are otherwise the city's responsibility.

Thank you.
