

## Public Art- Materials and Guidelines

Goal: To enhance the City of Waukesha through growth in Public Art and to bring a unique and strong appreciation of art, while raising public awareness. The Public Art committee wants to bring additional art pieces into the city for everyone to enjoy, while making a safe and creative atmosphere for artists to express themselves and create pieces to showcase community pride and creativity.

Waukesha has a long, proud past and we pride ourselves in the many amazing pieces of public art throughout our downtown and city. Many pieces of art have been created to honor our city's history. Public art has the ability to enhance public spaces, promote community engagement, and create a sense of place that is unique to Waukesha's identity.

Public art can be a great way to drive economic revitalization and can increase overall attachment to a place. With so many amazing art pieces near Waukesha's downtown, we believe public art will enhance the livability and vibrancy of Waukesha.

### Materials

The public art committee recommends that artists use the following materials to create public art (sculptures, statues, etc.)

- Bronze
- Concrete
- Stone
- Steel
- Rubber
- Aluminum
- Metal
