Job: Tony Glaser

Roofing Section

Complete tear off and removal of existing shingles and roofing components on home.

- CertainTeed lifetime Landmark shingles (GEORGE TOWN GREY)
- CertainTeed Shadow ridge HD cap shingles
- ~~CertainTeed 12 inch filtered ridge vent~~
- CertainTeed Roof Runner synthetic underlayment
- CertainTeed Winter Guard ice barrier over all gutter eaves, under valleys, chimney, and around pipes as well as step flashing.
- CertainTeed Swiftstart self sealing starter strip along eaves, gables and valleys
- Broan 636 roof cap
- Broan 634 roof cap
- Lead pipe flashing
- All caulk used will be Quad OSI
- W- Style valleys with baked on rust free enamel
- D- Style drip edge with baked on rust free enamel (Flat roof on dormer, no drip edge figured on main home)
- Check step flashing / replace if compromised

*** Special Notes ***

- Install 2 courses (6') of winter guard on all eaves of home
- Install new headwall flashing on front of northwest dormer
- Sandwich East valley in winter guard to prevent water runoff skipping under shingle line
- Power fan is to remain
- WHI's information has been provided. At this time all attic venting is figured for replacing in existing locations.

*** Preferred Contractors ***

Wisconsin Home Improvements (Insulation inspection) 262-345-9922

Renail all loose roof decking and replace if rotten or damaged (\$3.50 per Sqft to replace plwood. \$4.75 per Lnft to replace 1x slat boards).

All workmanship is protected by a 5 year craftsmanship warranty in addition to CertainTeed SureStart Plus 4 Star Warranty and 130 mph Wind Warranty. Protection of all landscaping and home exterior.

\$17,225.96

Flintlastic

Install flintlastic on Northwest side dormer and on the bay window roof located on back of home. (COLONIAL SLATE)

Flintlastic on NW Dormer = \$642.65 (Original proposal amount)

Flintlastic on Bay window = \$325.00 (Per text conversation on May 24th)

\$967.65

Install counter flashing

Install counter flashing on all rake walls of home over step flashing. All counter flashing areas will have a 3/4" groove ground into the exterior. The counter flashing is hemmed at the top to sit in the new groove and then sealed. Installing the counter flashing into the groove with sealant vs applying to the exterior wall with a bead of sealant provides a lot more protection. Counter flashing color can either match the shingle color or we can select a different color to match your home, I will provide a metal swatch if this option is chosen. I attached 4 photos of some counter flashing we recently did for a client repair to give you an idea of the finished look.

(MC 30 WHITE)

- Aluminum Trim coil
- Quad OSI

\$771.88

EPDM

Complete removal and disposal of EPDM roofing system on lower westside of home. Quoted amount per text conversation on May 24th
