

## **Proposed Goals for City Administrator through 2018:**

1. Implement a performance measurement system and fully integrate the NeoGov software into our application, orientation, and performance measurement practices by December 2018.
2. Explore an initiative similar to the health clinic, to partner with the County and/or School District to save the City a minimum of \$250,000.
3. Develop a survey to take the pulse of the Development and Business Community to improve their experience with the City of Waukesha.
4. Assemble a team of Leading Waukesha graduates to develop ideas to increase efficiencies in City government and to collapse silos between departments.
