Subject: Water Usage - 2904 Lookout Ridge Ct

Mr. Damien,

In July of this year, we converted 16,000 sf of forest into a back yard at our home. We have a 2-acre lot but could only use about 25% of it. Our Contractor used the hydro-seeding process for the grass and for the next 2 months, I had timed sprinklers set up to allow the seed to germinate and begin to grow. I knew water usage would be high but until I received a call from the Water Department a few minutes ago, I had no idea how much.

The young Lady explained that our normal usage per quarter was 18,000 gallons. The usage this quarter reached 120,000 gallons. Once I explained the reason for the high usage, she was relieved to know there wasn't a leak.

I also asked her if there is any hope of getting a reduced sewer rate for the upcoming bill as none of the water entered the sewer and therefore, did not have to be treated.

Your office suggested that I send you this message explaining the situation to find out what could be done. I am not attempting to pay for my usage but would greatly appreciate and consideration in relieving me of the sewer burden which I did not use above and beyond my normal rate.

Thank you in advance for your time and consideration,

Anthony Sawyer
