

Grant #: 18

Applicant: Lieutenant Joseph D. Hendricks

Abstract (Attachment 4):

Project Title: Digital Evidence and Intelligence Enhancement

The City of Waukesha is a multi-cultural community of approximately 70,000 residents. The city has worked hard to renovate and reinvent the downtown business and entertainment district. Digital technology improvements will help us better deploy our police resources and become more efficient at solving and preventing crime. Digital evidence, updated technology equipment, computer software and hardware investments, and associated training costs will assist us in organizing, identifying, and storing digital evidence for more effective criminal investigations.

The goal of this project is to enhance the police department's ability to equip and train officers with updated digital technology. By fulfilling this objective, we will gain intelligence and provide superior cases for prosecution. Strategies to achieve this goal will focus on providing updated digital technology and training to officers.

Project Identifiers:

- Computer software/hardware
- Equipment - General
- Training and Technical Assistance
- Equipment—Video/Audio recording
- Surveillance
