

Notice of Sale of Used AVL Hardware

The e-mail below was sent out on 2/2/15 to Racine, Madison and Duluth Transit Systems which still use the TransitMaster System.

Hello Fellow AVL TransitMaster Users-

We, Waukesha Metro, just kicked off our replacement AVL system project and was wondering if there is any interest in our TransitMaster AVL equipment. Most of the fixed end radio and server equipment is original from 2003 as is some of the onboard equipment but we do have MDTs and IVLUs from 2007 (4) and 2011 (6). We anticipate having the TransitMaster system shut down by the end of June possibility sooner. If you would have any interest in any of this equipment to be used as whole or for parts, please contact me to discuss. Thanks.

Sincerely,
Brian Engelking
Transit Manager

The list of equipment for sale was also posted on the Transit website. Only the Duluth Transit Authority submitted a bid.
