## **In Home Salon**

This application is requesting the use of my personal home basement for use as an 'appointment only' salon. The basement has all the required needs according to DSPS for an in home salon. This space is completely separate from the living quarters of our house and has its own bathroom and entry point. Providing these services at the house would not disrupt the neighbors or neighborhood in any way, as it would only be one client at a time and for very limited hours throughout the week. I would accommodate appointments within reasonable hours during the day anytime from 8am to 9pm. There are 2 parking spaces behind our house that clients may use as well as legal temporary street parking in front of the house. The specific services I would offer there as of now are:

- Hair cutting
- Hair coloring
- Chemical Hair services
- Services related to Aesthetics- facials, waxing, skin care.
- Eyelash extensions
- Eyelash lift and tints
- Eyebrow lamination

I am currently a licensed Aesthetician and Barber in the State of Wisconsin. I have attached my licenses. I also understand that this will require me to obtain an establishment license through DSPS.

Thank you
