## **Request to move permanent shed displays in Home Depot Parking Lot to new permanent location:**

- **Current shed displays are at the West end of the parking lot** (view p3)
  - Moving sheds to new location will allow:
    - Expanded selection of shed displays
    - Gain of 16 parking spots on west end of the lot when the sheds are moved, as well as improve areas for snow accumulation/removal in the winter. (currently limited)
- **Store is proposing any of the following options:**
  - **Option 1: Back-to-Back, Island Row of Sheds** (view p4)
    - 10 parking spaces in 2 rows, back-to-back will be converted to permanent shed display locations.
    - Additional parking available near the back of the lot in the same rows. Allows flow through the lot.
    - No change to handicap parking and cart corrals not disrupted
  - **Option 2: Long Single Row of Sheds** (view p5)
    - 18 parking spaces will be converted to permanent shed displays.
    - Will maintain 1 cart corral in the middle to maintain carts in lot, prevent damage to vehicles and to displays
    - Directs traffic to the main access channels by partially dividing the lot
  - **Option 3: Galley Row of Sheds** (view p6)
    - 10 parking spaces in 2 rows facing each other will be converted to permanent shed display locations.
    - Additional parking available near the back of the lot in the same rows. Allows flow through the lot.
    - No cart corrals disrupted
- **If approved, store will:**
  - Remove parking lines in new area for the shed displays
  - Re-establish parking spaces/lines on the West end of the lot once sheds are moved to the new permanent location
