Fred,

I was told to write to you regarding my last water bill to see if there was some sort of relief I could get for it. I recently did a lot of landscaping in around my home, the majority of which was sod and grass seed. Due to this, I used an excessive amount of water over the last billing time period. I was unaware that there was a device I could put on my home to monitor the amount of water used that does not go directly back to the sewer system.

I understand completely the amount of water used, and I have no issue with that portion of my water bill. My concern is the amount of wastewater I am being charged for. My average bill is around \$180 a quarter, this most recent bill was \$670, over \$300 of it was for wastewater. I have a hard time stomaching this portion knowing that the majority of that water never went back to the treatment plant. Please let me know if there is anything that can be done to help me with this situation.
