BASEMENT RESTRICTION - GROUNDWATER
 Although all lots in the Subdivision have been reviewed and approved for development with
 single-family residential use in accordance with Section 236 Wisconsin Statutes, some lots
 contain soil conditions that, due to the possible presence of groundwater near the surface, may
 require additional soil engineering and foundation design with regard to basement construction.
 It is recommended that either a licensed professional engineer or other soils expert design a
 basement and foundation that will be suitable to withstand the various problems associated with
 saturated soil conditions on basement walls or floors or that other special measures be taken. Soil
 conditions should be subject to each owner's special investigation prior to construction and no
 specific representation is made herein.

- EASEMENT NOTES:**
1. No building or fence shall be constructed in sanitary sewer, storm sewer, drainage and water main-easements. No trees or
 bushes which would grow to more than 4' in height shall be planted within said easement without approval of the City of
 Waukesha Engineering Department and the Waukesha Water Utility.
 2. In the event the water utility finds it necessary to disturb the premises in the exercise of its duties and responsibilities (future
 repairs, if necessary), The Utility agrees to restore the premises of the Grantor, as nearly as is reasonably possible, to the
 condition existing prior to such disturbance, however, not including the replacement of pavement, trees, shrubbery and other
 items existing on or within the described easement.
 3. Grade changes within the Permanent Water Main Easements which exceed 12" (one foot) shall not be made without prior
 written approval of the Waukesha Water Utility.
