Notes:						
Mobile security tower will be more hazardous to vehicles. Propose adding cameras to building structure.

Notes:						
Planning staff recommends denial of this application.						
22.15(3)(a) The design, height, and exterior appearance of the structure is architecturally and aesthetically incompatible with its surroundings.						
The request is to permanently install a temporary structure. It will experience significant wear and tear and will likely become an eyesore quickly. Cameras mounted to existing light poles or to the building would be more compatible and are preferred.
