Attn: Mr. Fred Avadi

Mr. Avadi

My Wife and I moved into our new home at 1529 Mohican Trail in March 2015. In July we had our landscaping completed which included a newly seeded lawn with irrigation as well as plant material. This past quarter was spent trying to keep the plant material watered as well as establishing the lawn. When we received our current water sewer bill we were a little surprised at the total amount. It seems that the method used to determine the sewer charge is based on water usage however lawn irrigation and hand watering has no impact on actual sewer usage. I'm sure there is nothing that can be to credit this past quarter's usage however going forward I am requesting that a deduction meter be installed for the lawn irrigation so in future summers we are not paying over our fair share to the sewer system.

Please let me know if this is a possibility and what the cost to us we be to get this done.

Sincerely Yours,

Bruce Landry
