Subject: Clearwater Apartments – Final Site Plan & Architectural Review	

Details:
This proposal is for final site plan and architectural review of the Clearwater Apartments Phase 2. The area of development will be northeast of the original phase and include two smaller 2-story apartment buildings, an 11-unit building and a 14 unit building. Each unit will have a dedicated garage space within the building and an outdoor surface space in front of the garage door, spaces for visitor parking have also been provided. Architecture will be done in the same style as phase one, using stone veneer with LP Smartside siding. While the buildings will kept out of the wetlands, there are several areas where grading activities will disturb the wetlands. Several excess parking spaces have been removed to minimize the impact. The low spot in the sidewalk along Clearwater Lane which has been a flooding and icing problem and will be addressed with this project. The landscape plan proposes a generous mix of trees and shrubs and permission for planting within the easements along the driveway has been obtained.
