

# SECURITY ASSISTANCE FOR MERCHANTS

Introducing

## PCIASSURE®

A Service of  **openedge**  
A division of **globalpayments**

Understanding the requirements of PCI compliance isn't easy. OpenEdge provides a solution that doesn't leave you searching for answers.

Our PCI ASSURE® program offers all the assistance you'll need to understand the requirements and secure your processing environment.

Our program is designed to simplify what can be a very complicated process. If you're a merchant who accepts credit cards, you need PCI ASSURE.

## THE PCI ASSURE® PROGRAM INCLUDES THESE CRITICAL TOOLS:

### ACCESS TO THE PCI ASSURE MERCHANT PORTAL

Merchants have 24/7 access to our web-based portal that steps you through the requirements and the necessary Self-Assessment Questionnaire (SAQ). You'll be guided through the entire process online through the use of expert assistance and real-life examples. Completion of the SAQ is greatly simplified as the portal was developed specifically for merchants processing with OpenEdge's solutions. This makes PCI ASSURE by far the best option for PCI assistance for OpenEdge customers.

### QUARTERLY IP NETWORK VULNERABILITY SCANS

Administered by ControlScan, these comprehensive system scans are designed to find problems in a merchant's environment before a compromise occurs. Easy-to-understand reports detail the results and instructions are provided to fix any identified issues.

### SECURITY POLICY BUILDER

This online tool creates a set of custom security policies that are automatically generated based on the way you process payment cards, making it easy to comply with the PCI DSS requirement associated with creating or maintaining a security policy.

### TOLL FREE CUSTOMER SUPPORT

Many PCI assistance programs leave you on your own to navigate your way through an online system of questions and decisions. With PCI ASSURE, the OpenEdge PCI Service Team is available to you, offering live assistance every step of the way. You're always just a phone call away from help.

### SECURITY BREACH PROTECTION

Included in the PCI ASSURE Program is an affordable breach reimbursement program that covers a merchant for up to \$100,000 (\$0 deductible) to pay for audits, fines or other expenses associated with a processing breach. Given the potential costs to a merchant who experiences a breach, this coverage is a valuable component of the PCI ASSURE Program.
