Ms. Kozlik:

Thank you for speaking with Legal Sales Director James Bonneville regarding our Self-Publishing Software service. This service is an ideal solution for clients who prefer to maintain control of the updating of their Code of Ordinances (and additional publications) independently in-house for a fixed annual cost.

Municode has been connecting our local government clients with their citizens since 1951! Whether through the legal codification process, our full-service or self-service code updating options, our robust suite of online legislative search tools, meeting management and agenda software or custom government website design, we have the experience, resources and expertise to provide our clients with innovative products, superior technology and excellent customer service. We encourage you to visit our corporate website to explore our full suite of local government services: <https://www.municode.com/>

After your Code material is converted to Municode's database, authorized users can log in to the online Code, draft proposed changes directly within the contents of the Code, automatically generate ordinances and resolutions, and then publish the amended Code on the web. To view an online Code that is maintained and published by Municode via our Self-Publishing Software option, please visit the Alpine City, Utah Code: <https://alpine.municipalcodeonline.com/>

## Our Vision: Simple, Seamless Integration

Our vision is to create seamless integration between our service offerings. The goal is to reduce staff workload, while at the same time, increasing the ability for municipalities to connect with their communities.

The following example integration points are either in place today or envisioned in our future strategic roadmap.

- Unified search across all platforms (website, meetings, online codes)
- Auto-publish agendas and minutes from the Meetings platform to the Website
- Ordinance auto-publishing from the Meetings platform to your online code, queued for supplementation, Code of ordinance cross-references to legislative voting history, minutes, and video/audio

# SCOPE OF SERVICES

---

Our Self-Publishing Software was created specifically for municipalities who prefer to publish and maintain their Code (and other selected publications) online and “in-house”, using your staff in lieu of Municode’s team of Legal Editors and Legal Proofreaders to edit and update the Code.

Self-Publishing Software puts the maintenance of the Code directly into our client’s hands and is equipped with all the tools and technology needed to ensure the successful self-maintenance of your Code and other publications.

## We Convert Your Code, You Publish

The self-publishing process begins with converting your recently updated and current Code of Ordinances into Municode’s Self-Publishing software platform. If desired, our experienced editorial staff is available to provide assistance to bring the Code current for online publication, or to assist in updating the online Code at any future point in time, as indicated on the **Price Quotation Sheet**. While some municipalities may prefer the complete independence our online framework offers, we are always available to assist upon request. What if you don’t have an official Code, but still wish to utilize this service to record and update your legislation?

During the Code conversion process, you can elect to keep your current Code numbering system or consult with Municode staff to create a logical and inclusive code numbering system that will allow for the continued growth and expansion of the Code. After your material is converted to the Municode software platform, we will provide the necessary training to enable authorized users to update the online Code of Ordinances. This process occurs through our proprietary code-to-document proposal method (which generates automatic digital ordinances/resolutions), or by converting a passed document into the online platform.

## Your Changes = Instant Ordinances

As you propose changes in your online code, your edits are tracked and redlined, allowing you to generate automatic ordinances or resolutions for legislators. All proposals made to the Code are automatically numbered and redlined, enabling your Council to clearly see what material has changed, and how those changes will impact your code. Upon passage, staff digitally applies roll call votes. Signatures and seals are applied via email approval. Once the attester approves, your code is current.

## Sign, Seal & Update by Email Approval

After the automatically generated document is passed by your Council, an email is generated to request the approval and authorization of your presiding Officer(s) and Attester(s). Upon their authorization, your online code can be instantly updated, and the documents may also be digitally signed and sealed.

In addition to self-publishing your Code of Ordinances, other books or publications can be published and updated within our Self-Publishing platform, such as Minutes, Policies & Procedures, Fee Schedules and more.

# SELF-PUBLISHING SOFTWARE FEATURES

---

## Complete Edit, Legislative History

Transparency is your and our primary objective. All changes made to your code within the system are fully and automatically documented and recoverable. The Self-Publishing Software service automatically records your legislative history for your citizens to see the evolution of your code supported by the actual ordinances which adopted, amended, or repealed your section of the code.

## Ordinance Design & Review

While some cities and towns may prefer the complete independence our online framework offers, other communities may request assistance from our full-service codification staff. Our experienced staff is available to provide your community with codification services which can include ordinance review, design, and support. Whether you need assistance using the software tools, or in reviewing or designing ordinances, we have a dedicated staff available to help with all your codification needs.

## Email Notification of Updates

How often do staff or citizens ask you the last time the code was updated? Give everyone the ability to sign up for email notifications! Users will receive an email containing a link which directs them to what has changed.

## Ordinance/Resolution Drafting Tool

As you propose changes in your online code, your edits are tracked and redlined, allowing you to generate automatic ordinances or resolutions for legislators.
