Re: November pandemic update

The daily average of new cases in the county continues to fluctuate or generally rise. On December 1, 56.8% of City residents had received at least one dose of the vaccine. In the county 63.5% of all residents had received at least one dose.

Many staff and some members of the public wear masks in the library. With the construction and closing at the end of November we've seen less foot traffic which may help slow the spread of the disease. No additional staff have reported being infected with COVID in November.
