COMMUNITY OWNERSHIP

COMPLETION AND UNVEILING

From the inception of a project we take you from initial sketches and concepts through the installation and unveiling of the project.

CONSULTATION One of our key management personnel will meet with you to discuss the scope of your project. Upon communicating your ideas and answering your questions, we will provide you with a price and cost breakdown of materials, engraving services, accessories, construction and installation work. We will also provide a detailed timeline required for each phase of the project. If this appeals to you, the project becomes much more of our baby than yours. We will make sure that no aspect is overlooked and provide the best possible outcome.

CREATE PLANS Based on the consultation, and our understanding of the scope of the project along with any inspiration examples you provide, our experienced design team will provide design options with emphasis on functionality, longevity and minimal maintenance using materials that withstand the elements of nature.

LIFE LIKE RENDERINGS Our draftsmen will then create detailed 3D renderings from various vantage points using multiple material options, allowing you to vividly visualize the project. We will also provide a comprehensive video rendering as well as night lights rendering.

SCOPE OF WORK We will provide an extensive Scope of Work document for the project. This will map out the entire step-by-step process we will take to complete our project, including material specifications, production planning, engraving and artwork details, onsite work such as excavation, foundation, installation, plumbing, electrical plans and maintenance plans.

DETAILED BUDGET At the end of the Scope of Work will be the detailed Budget Items Worksheet, which shows the price breakdown for individual items. This will help you understand the total cost of your project.

REVIEW & PROPOSAL MEETING On average, it takes us about 2 weeks to complete the designing process and compile the Scope of Work and Budget documents. When the designs are complete, we will send them for your review. At this stage our goal is to review and finalize the material and manufacturing related plans. This will help us start the material sourcing and manufacturing at the factory. Since this is the longest chain of the entire project we will commence work on this as fast as possible. Any design and artwork related changes can be accommodated and revised for approval until the completion of the manufacturing portion of the monument.

OBTAINING REGULATORY APPROVALS AND PERMITS We will work with the appropriate agencies to obtain the regulatory approvals and permits.

CONSTRUCTION Once all the major material and construction plans are approved by you and the permits are obtained we will commence the onsite construction work. This includes excavation, concrete foundation, masonry work, landscaping work, electrical and plumbing work. This work will be dependent upon the weather conditions. We will keep you updated regarding the progress made with timely and detailed photos and notifications.

MONUMENT ENGRAVING After the approval of the artwork, names, dates, verses and all messages of significance we will engrave the monument using sandblasting, cnc milling and cnc laser engraving processes. There are some elements that will involve comprehensive sculpting and crafting work that are done manually. We will have your final approval before we start personalizing the monument.

INSTALLATION Once the site construction work is complete we will ship the materials to the construction site from our facilities. We will arrange heavy duty construction equipment to unload and install the monuments according to the approved plans.

FINISHING TOUCH After the installation is complete we install the accessories made of stainless steel, bronze or porcelain to provide that final finishing touch to the monument. We make sure every part of the monument is completed to your satisfaction.

COMMUNITY OWNERSHIP The biggest part and the main purpose of a memorial project is its ability to excite and bring the community together to own that project. We will assist in strategies to involve citizens of all age groups to participate in the project. We help with planning and execution of the unveiling ceremony with marketing materials, promotions, commemorative products.

Depending on the complexity of the project, site conditions, time to get approval for designs, regulatory compliance and weather conditions a project can take anywhere from 2 months to 8 months for completion. On an average a project takes about 6 months for completion during the fair weather conditions and about 8 months during the winter months.

Monument Warehouse LLC ,

Monument Warehouse is your one stop source for all your memorial project needs. We are a Quarrier, Manufacturer, Designer and Builder of lasting, and meaningful works of art in Granite, Marble, Porcelain, Bronze, and Stainless steel. From the quarry to installation, concept to installation, and beyond, we do it all.

We are engineers, builders, craftsmen, designers, artists, sculptors, stone masons, graphics designers, CAD draftsman, computer programmers, robotics engineers with decades of expertise in memorial building. Above all we are driven by passion. Passion to make a difference in our own unique ways.

What does that mean for you? We understand what it takes from the start to finish. Using our expertise we incorporate all possibilities of execution right in the design stage to avoid any surprises down the line. It means that instead of hiring an artist, architect, and a designer to create a concept design, and then searching for a manufacturer to produce the monument and a contractor to build and install it, you can find everything you need in our one-stop-source - From our quarriers to you.

Using our background, experience, expertise and infrastructure we remove the hassle and headache out of building a meaningful memorial project. Our goal is to work with clients who don't have the vision or the expertise to bring their projects together on their own. We understand that it can be daunting, stressful and above all hard to know where to start when it comes to conceiving and building a project that is so meaningful and impactful on a community.

With over 250,000 square feet of built-up area, our own worldwide manufacturing and distribution facilities specialize in crafting monuments and memorials that we proudly call ours. Based out of Elberton GA - "The granite capital of the world", we build memorials that are larger than life and often the best tribute that anyone could have built.

We operate our own quarries and factories that manufacture the monuments. Using our own infrastructure allows us to have complete control over the quality of the process because of the seamless integration of the entire supply chain.

We have over 750 wholesale customers in the monument industry - Retail monument dealers, funeral homes, and cemeteries. Apart from wholesale, we work with veterans organizations, government agencies and independent organizations to help design and build large civic memorials, war memorials and memorial parks consisting of monuments, benches, statues, pavers, utilities for lighting, acoustics, water and fire features.

### **Highlight**

Quarry Direct - From the Quarries to the installation - We are one single source

Infrastructure - Own quarries, factories worldwide with over half a million square feet of manufacturing infrastructure. About 200,000 square feet of production and warehousing space in India and China. 8 locations spread across 3 states in the USA.

Design capabilities - In house CAD/CAM department with experience in modern drafting and manufacturing software and tools.

Depending on the complexity of the project, site conditions, time to get approval for designs, regulatory compliance and weather conditions a project can take anywhere from 2 months to 8 months for completion. On an average a project takes about 6 months for completion during the fair weather conditions and about 8 months during the winter months.

### **Project Staff**

#### **Key Personnel**

Ganesh Muruganantham - President - Mechanical engineer and an MBA from Cleveland State University. Worked in the industry for over 30 years. (800) 300-8025 x 3102 [gm@monumentwarehouse.com](mailto:gm@monumentwarehouse.com)

Senthil Muruganantham - Vice President - Civil engineer and Architect from The Ohio State University.

Worked in the industry for over 25 years. (800) 300-8025 x 3103 [sm@monumentwarehouse.com](mailto:sm@monumentwarehouse.com)

Divya Muruganantham - Vice President - Textile engineer with over 15 years of experience in project design and management. (800) 300-8025 x 3100 [dm@monumentwarehouse.com](mailto:dm@monumentwarehouse.com)

Nivya Easwar - Vice President - Textile engineer with over 10 years of experience in project management and coordination. [nivya@monumentwarehouse.com](mailto:nivya@monumentwarehouse.com)

**JACKSON A.**  
Apr. 2, 2013  
Nov. 23, 2021 **SPARKS**

Jackson was a 3rd grader at Clarendon Avenue Elementary School and a member of LifePoint Church in Mukwonago. Jackson loved baseball and played for the Waukesha Blazers. When not playing baseball, or slam-dunking basketballs throughout the house, Jackson enjoyed fishing, catching frogs, and playing with his brother Tucker and his dog Qi'ra.
