| Subject: Request received from WE Energies to recommend approval of proposed easement associated with the West By-Pass Project and Meadowview Park site. | |

Details:
WE Energies proposes to relocate two power poles on the future park site (Meadowview) located at the corner of Northview & Meadowbrook Roads. The relocation would accommodate for the planned improvement to Northview Road, specifically the addition of a right turn lane. City staff from Parks and Engineering Departments met on site with WE Energies to review the proposed easement plan. It was determined that the proposed relocation and related easement would not create concerns in regard to the Master Plan for park development and would support the planned improvements associated with Northview Road.

Options & Alternatives:
Other viable options were discussed, none identified.

Financial Remarks:
Associated costs with the easement would be the responsibility of WE Energies.

Executive Action:
Approval of proposed easement associated with the West By-Pass Project and Meadowview Park site.

Committee Recommendation:
This item was approved (recommended to Council) 7-1 vote by the Parks, Recreation & Forestry Board at their 3/20/17 regular meeting.
