CITY OF WAUKESHA
BUILDING INSPECTION

Mount Calvary Evangelical Lutheran Church. 1941 Madison Street, Waukesha, WI

Reason for digital sign:

-Our current sign is very dated and starting to become dilapidated. In need of a new sign we want to replace it with something clean, elegant, and updated. Our current sign does not represent our school and church complex.

-Instead of using temporary (and poor looking) signs for upcoming events we would display them on the screen (within all parameters set forth in the requirements of digital sign usage for the city of Waukesha). This would keep our yard less cluttered and provide a better appearance for our neighborhood.

-The digital sign we would like to place has ambient lighting controls so it automatically dims in the evening so as not to cast light in the neighborhood. Also we are very conscience of our neighbors and will work with them to find a time to turn the sign off in the evening to eliminate any inconvenience or concern on their part.

-Our current sign is too hard to read. We would like the ability to have text large enough to see as people pass our property.

-We will be using the same sign manufacturer as Lowell Public School. Lowell is right around the corner from our location and across from the same residential area and they have received no complaints about their sign.

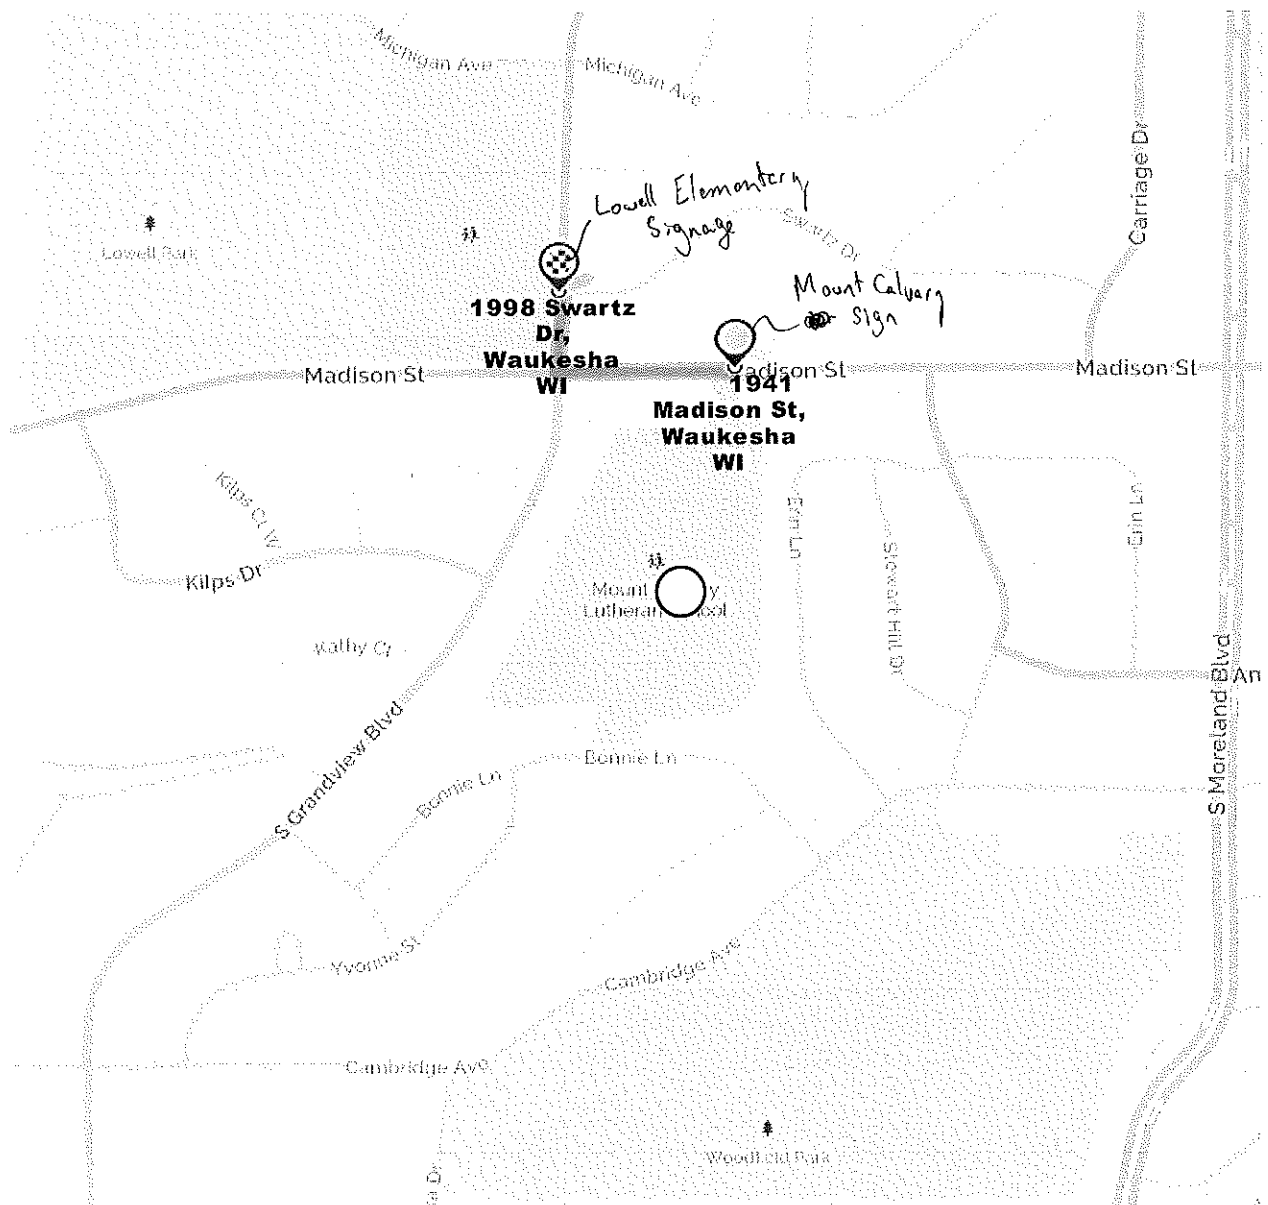

-The standard height of the sign is 8 ½ feet but we would reduce it to 6 ½ feet to match the height of our current sign. Stewart Signs says that this would be perfectly fine and wouldn't affect the overall operation of the sign.

Usage Plans:

-To display upcoming events of our school and church.

-Limiting ourselves to until evening and willing to turn off the sign by 9 – 10 pm to be good neighbors to our community. (The light put off by the digital sign is only a fraction of the wattage of the street light only 40 feet away from where the sign will be).

-When we replace our current sign we would move it several feet further back from the current location from the sidewalk/street but would keep the horizontal distance the same as our current sign.

Mount Calvary Ev. Lutheran School and Church

Existing Sign. Location would be the same but pushed 3-6 feet farther back from the sidewalk.

Also visible is a temporary sign. We would like to stop relying on these.

As is visible, the current sign is in poor condition and needs to be replaced. After seeing Lowell Elementary's sign and talking with them and others in the neighborhood we feel that a digital sign would greatly improve the appearance without causing issues.

Stewart Signs has been serving organizations like yours **since 1968**. This experience makes us uniquely qualified to serve your sign needs. Don't take my word for it, though; ask your neighbors about us!

The following is a small sampling of customers in your area that have invested in our product. These results represent only a few of **over 40,000 Stewart signs** out in the field, including **115 signs installed in Wisconsin within the past 10 years**. Viewing installed signs is one of the best ways to experience the quality built into every Stewart sign, and I encourage you to visit a few locations.
