PLSR Model Development Comment Form

Model W - - See <http://www.plsr.info/recommendation-development-phase/> for detailed model information

Maintains current regional library system structure based on county affiliation. Focuses on incremental change in library systems by targeting areas where outcomes can be improved to better serve local library users throughout Wisconsin. Areas targeted for improvement are library system funding formula and library system standards of service.

3. What are the strengths/upside of the Model?

4. What are the potential challenges/downside of this model?

5. What is the unique contribution/approach of this model?

6. Which design principles does this model fully satisfy, partially satisfy, and fail to satisfy?

	Fully satisfies principle	Partially satisfies principle	Fails to satisfy principle
Proactively foster, build, and maintain trust throughout the library community in Wisconsin.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Allow for innovation and for services to evolve.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Include transparency in decision making.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Ensure accountability to the public library community.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

	Fully satisfies principle	Partially satisfies principle	Fails to satisfy principle
Achieve efficiencies relative to cost and service.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Protect public libraries willingness to explore new service models and to enter into large scale collaborations.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Minimize any negative fiscal impact on libraries as much as possible.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Response to local public library needs.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Preserve or improve the level of services currently provided by systems. Services will not be decreased for some libraries in order to improve services for others.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Ensure all Wisconsin public libraries have the capacity to provide equitable access to excellent library services regardless of the race, ethnicity, income, gender, or employment status of the people they serve, or the their location within the State.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

7. Does this model create winners/losers or does everyone win?

8. What changes could be made to this model to improve its responsiveness to the design principles, reduce the downsides, and reduce losses for one or more stakeholders?

9. What are the questions about this model that first need to be answered to enable us to make a decision about whether this model is best at meeting the needs of Wisconsin's public libraries? What additional information do we need to inform our judgments about the effectiveness of this model? What information is most critical for us to know? Where might this information be available?

PLSR Model Development Comment Form

Model Y - See <http://www.plsr.info/recommendation-development-phase/> for detailed model information

6-8 Regional Library Systems under a Statewide Services Umbrella. This model aligns with delivery regions which also incorporate one or more shared ILS. A statewide governing board and statewide service management team help provide and monitor service expectations. Creating a statewide service philosophy with a more formalized regional structure.

10. What are the strengths/upside of the Model?

11. What are the potential challenges/downsides of this model?

12. What is the unique contribution/approach of this model?

13. Which design principles does this model fully satisfy, partially satisfy, and fail to satisfy?

	Fully satisfies principle	Partially satisfies principle	Fails to satisfy principle
