

PROJECT QUOTE

PREPARED FOR: **Jeffery Robb**
501 Dunbar Ave, Waukesha, WI 53186, USA

Fully Adhered Flat Roof Fleeceback system over front porch

Furnish and install one layer of mechanically attached 1/4" Fiberboard

Furnish and install a Fully-Adhered 60 mil reinforced fleece backed membrane according to specs and to NRCA details.

Fleece back membrane will cover flat roof and reline the existing built in gutter.

Cut back existing tin gutter that overlaps onto the fascia in order for new metal to be installed

Furnish and install reinforcement strip around detail areas, any 90 degree bends and into the gutter.

Furnish and install mechanically-attached Kynar-finish edge metal in _____ color on the perimeter of the gutter and where the membrane meets the siding. Seal the compression-side of the bar with one-part urethane sealant as per manufacturer's specifications

Furnish and install new custom made counter flashing using break on 5 stone pedestal (Cut riglet into mortar and stone to provide proper metal barrier over membrane. **(The pedestals are built of stone and mortar. The stone is spalding/popping and some of the mortar is loose. It is recommended to speak to a mason)**
