Re: **Westbrook Shopping Center**

To Whom It May Concern,

I am writing in regards to the current parking lot lighting at Westbrook Shopping Center.

Lyons Electric is being asked to swap 18 existing parking lot poles with new and upgrade the lights to LED on all the existing bases.

Currently this parking lot site has 40' light poles that are rusting, becoming a serious safety concern. I am aware the lighting standards currently allow for pole lights up to 20' with a maximum mounting height of 24'. While I understand these standards are in place for a reason, the 20' light poles would not allow us to properly light the parking lot area. I am asking that you consider allowing us to use 28' poles with a final mounting height of 30' to alleviate this hazardous situation while still providing adequate lighting for this establishment.

Thank you for your time and consideration in this matter.
