Since the last Board meeting, the 7-day average of new cases in the county has increased and now sits around 150 per day. The above chart shows the average of new cases from June 20, 2020 with the several surges obvious. As of October 6, 54.5% of City residents had received at least one dose of the vaccine. In Waukesha County 61.7% of the population has had at least one dose.

Because of the pandemic and renovation, the library continues to host only a few outdoor programs, a few of which have been held inside when the weather has been bad. Many staff wear masks and some of the customers do, as well.
