Re: November 2021 Pandemic Update

Tracking the 7-day average of new cases in Waukesha continues with no clear indications of progress. After the mid-September surge, cases have dropped but currently don't seem to want to fall any further. As of November 3, 62.7% of Waukesha County residents had received at least one dose of the vaccine. City of Waukesha numbers continue to lag that, with just 56.2% of residents having received a dose of the vaccine.
