

Legislation Text

File #: ID#17-0966, **Version:** 4

This item was originally brought to the Buildings & Grounds Committee in 2017. The nature of the request would involve an extensive review of the existing city wide truck routing and restrictions map. The items was placed on hold. The Department of Public Works has updated the truck route map with some new features and additional roadway information. This map will be available in a paper copy in the DPW office and will be on the City website. In 2019, engineering staff will take on another review of the truck route map as the West Bypass project nears completion.

This updated map is being presented to the committee as a matter of report. No action is required.
