Notes: 1. The scope of work is to remove existing stucco exterior cladding that has been deteriorating and replace it with an EIFS exterior cladding system on the multi-story brick and stucco medical office building. No other site work or disturbance appears to be proposed. As such no further engineering review comments at present. 2. Additional required submittals, fees, financial guaranties may be needed prior to issuance of permit. 3. The construction drawings, and financial guarantees should be reviewed and approved prior to the construction being started and permit issued. If the location of any work needs to be changed as a result of the approved construction drawings, the drawings should be updated to reflect the needed changes. 4. In accordance with Wisconsin Administrative Code A-E 2.02(4): Each sheet of plans, drawings, documents, specifications and reports for architectural, landscape architectural, professional engineering, design or land surveying practice should be signed, sealed, and dated by the registrant or permit holder who prepared, or directed and controlled preparation of, the written material. 5. Submit all required checklists for Development Submittals. See City's Development Handbook.
