Good morning Jim,

I appreciate your patience on the review. I spoke with our engineers late yesterday and they do not have any additional concerns with the installation of the windows.

Prior to construction, please set a time to meet with my operations supervisor, Josh Matekovic, to coordinate access and review operating on the airport. He is included on this email. I look forward to joining if my schedule permits.

Have a good weekend,

Kurt

Hi Jim,
Yes, it was sent and I'm discussing with them. I'll have final determination by the end of the week.
Have a good day,
Kurt

Kurt,

Just checking to see if you had an opportunity to get the information to the engineer and if there was a determination issued?

Please update me when you have a moment.

Thank you,

Jim Warzinski — Estimator / Project Manager

Hi Jim,
Thanks for the additional information. I'll pass this to our engineers and get back to you.
Have a good weekend,
Kurt

Kurt,

As an addition to my initial email (below), attached is the performance specifications of the glass we have planned to use (Cardinal CG LoE³ 366) and an example glazing specification from the project architect for airport glazing.

With this specification — 1.4.B.1. MAXIMUM EXTERIOR VISIBLE REFLECTANCE : 15 PERCENT — the planned glazing appears to exceed the specification requirement at 11% visible exterior reflectance.

Please review with the airport engineer and confirm to us that the glazing is acceptable.

Thank you,

Jim Warzinski — Estimator / Project Manager

Kurt,

Thanks for the help with the project so far, I would like to get the glazing reflectivity issue resolved quickly.

Are you aware of an official glazing specification for the airport that can be sent to is? Or can you provide contact information for the airport's engineer at Mead & Hunt?

Feel free to contact me mobile if that would be more efficient.

Thank you,

Jim Warzinski — jim@fordconstructioninc.com
