Hi Charlie,

Please forward the following message to the Waukesha Landmarks Commission (for Section 106 review, we're required to reach out to local historical societies and landmarks commissions to provide an opportunity for input - I'll be reaching out to the local historical society as well).

Dear Waukesha Landmarks Commission,

I am writing to inform you of a proposed City utility project involving the demolition of three water utility well/reservoir/utility buildings. The structures are located at 223 S. West Avenue, 1430 S. East Avenue, and 2320 W. Sunset Drive. See attached map.

UWM-Cultural Resource Management has been contracted to investigate any potential historic and/or architectural resources within these project locations. In addition to our site visits and searches of the Wisconsin Historic Preservation Database (WHPD) and National Register of Historic Places (NRHP), we are interested in any properties that you believe to be of potential historic/architectural significance. If such properties exist within these project locations, or if you have any concerns about the project, please take this opportunity to contact me.

Thank you,

Gail Klein, M.S.
