Re: **All Engineering Requirements Met Concurrence Letter** – INNIO – Engine Test Cell Support Pad  
(SPAR26-00016)

Dear Applicant,

This letter is to inform you that the subject project has met all Engineering Division requirements to proceed with the application of building permit(s) through the Community Development Department. The requirements that have been met to date include:

- Final site plans with all engineering comments addressed (dated 03/12/2026)

Applicant shall acquire the following permits prior to beginning construction:

- City of Waukesha Erosion Control Permit
- City of Waukesha Excavation within the Right-of-Way Permit

As part of all building permit application(s), the site plans submitted shall match the final site plans reviewed by Engineering prior to this concurrence letter being issued. Failure to provide a matching site plan or submitting unreviewed changes after the issuance of this letter will result in a delay in permit review and approval.

If you have any questions regarding this letter, please contact me directly at (262) 295-7787 or [jmeyerhofer@waukesha-wi.gov](mailto:jmeyerhofer@waukesha-wi.gov)

Regards,

*Josh Meyerhofer*
