

Storm Water Management Practice Maintenance Agreement

VH Winterberry Reserve, LLC, a Wisconsin limited liability company, as “Owner” of the property described below, in accordance with Chapter 32 City of Waukesha Storm Water Management and Erosion Control, agrees to install and maintain storm water management practice(s) on the subject property in accordance with approved plans and Storm Water Permit conditions. The owner further agrees to the terms stated in this document to ensure that the storm water management practice(s) continues serving the intended functions in perpetuity. This Agreement includes the following exhibits:

Exhibit A: Legal Description of the real estate for which this Agreement applies (“Property”).

Exhibit B: Location Map(s) – shows an accurate location of each storm water management practice affected by this Agreement.

Exhibit C: Maintenance Plan – prescribes those activities that must be carried out to maintain compliance with this Agreement.

Note: After construction verification has been accepted by the City of Waukesha, for all planned storm water management practices, an addendum(s) to this agreement shall be recorded by the Owner showing design and construction details. The addendum(s) may contain several additional exhibits, including certification by Waukesha County of Storm Water Permit termination, as described below.

Name and Return Address

City of Waukesha
Department of Public Works
201 Delafield Street
Waukesha, WI 53188

Through this Agreement, the Owner hereby subjects the Property to the following covenants, conditions and restrictions:

1. The Owner shall be responsible for the routine and extraordinary maintenance and repair of the storm water management practice(s) and drainage easements identified in Exhibit B until Storm Water and Erosion Control Permit termination by the City of Waukesha in accordance with Chapter 32 of the City Code of Ordinances.
2. After Storm Water and Erosion Control Permit termination under 1., the current Owner(s) shall be solely responsible for maintenance and repair of the storm water management practices and drainage easements in accordance with the maintenance plan contained in Exhibit C.
3. The Owner(s) shall, at their own cost, complete inspections of the storm water management practices at the time intervals listed in Exhibit C, and conduct the inspections by a qualified professional, file the reports with the City of Waukesha after each inspection and complete any maintenance or repair work recommended in the report. The Owner(s) shall be liable for the failure to undertake any maintenance or repairs. After the work is completed by the Contractor, the qualified professional shall verify that the work was properly completed and submit the follow-up report to the City within 30 days.
4. In addition, and independent of the requirements under paragraph 3 above, the City of Waukesha, or its designee, is authorized to access the property as necessary to conduct inspections of the storm water management practices or drainage easements to ascertain compliance with the intent of this Agreement and the activities prescribed in Exhibit C. The City of Waukesha may require work to be done which differs from the report described in paragraph 3 above, if the City of Waukesha reasonably concludes that such work is necessary and consistent with the intent of this agreement. Upon notification by the City of Waukesha of required maintenance or repairs, the Owner(s) shall complete the specified maintenance or repairs within a reasonable time frame determined by the City of Waukesha.
5. If the Owner(s) do not complete an inspection under 3. above or required maintenance or repairs under 4. above within the specified time period, the City of Waukesha is authorized, but not required, to perform the specified inspections, maintenance or repairs. In the case of an emergency situation, as determined by the City of Waukesha, no notice shall be required prior to the City of Waukesha performing emergency maintenance or repairs. The City of Waukesha may levy the costs and expenses of such inspections, maintenance or repair related actions as a special charge against the Property and collected as such in accordance with the procedures under s. 66.0627 Wis. Stats. or subch. VII of ch. 66 Wis. Stats.
6. This Agreement shall run with the Property and be binding upon all heirs, successors and assigns. After the Owner records the addendum noted above, the City of Waukesha shall have the sole authority to modify this agreement upon a 30-day notice to the current Owner(s)

Dated this ____ day of May, 2025.

Legal Description: **Lot 2 of Certified Survey Map No. 12535, recorded in the Office of the Register of Deeds for Waukesha County, Wisconsin on February 13, 2024 in Volume 130, Page 222 as Document No. 4755028, being a part of the Northeast 1/4 and Southeast 1/4 of the Southwest 1/4 of Section 32, Township 7 North, Range 19 East, City of Waukesha, Waukesha County, Wisconsin.**

Exhibit B - Location Map

Storm Water Management Practices Covered by this Agreement

The storm water management practices covered by this Agreement are depicted in the reduced copy of a portion of the construction plans. The practices include storm conveyance ditches, culverts, all associated pipes, rip-rap pads, and other components of these practices. All of the noted storm water management practices are located within drainage easements and public right-of-way within the subdivision plat, as noted in Exhibit A.

Subdivision Name: Winterberry Reserve

Storm water Practices: Conveyance ditches, culverts, storm sewer pipe, and rip-rap areas.

Location of Practices: Drainage easements and public right-of-way

Exhibit C

Storm Water Practice Maintenance Plan

This exhibit explains the basic function of each of the storm water practices listed in Exhibit B and prescribes the minimum maintenance requirements to remain compliant with this Agreement. The maintenance activities listed below are aimed to ensure these practices continue serving their intended functions in perpetuity. The list of activities is not all inclusive, but rather indicates the minimum type of maintenance that can be expected for this particular site. Access to the stormwater practices for maintenance vehicles is shown in Exhibit B. Any failure of a storm water practice that is caused by a lack of maintenance will subject the Owner(s) to enforcement of the provisions listed on page 1 of this Agreement by the City of Waukesha.

System Description:

The proposed project is a single family residential subdivision. The development is being completed in conjunction with the Springs at Meadowbrook, a multi-family development located adjacent to the south and west. The stormwater management plan for this project was completed as a part of the Springs at Meadowbrook multi-family development. Drainage from this development will flow off-site to the existing stormwater management ponds in the Springs at Meadowbrook development.

The drainage from this property will flow to a wet bottom detention basin located off-site northwest of the development or to wet bottom detention basin located off-site southwest of the development. The off-site stormwater ponds will treat runoff to the required water quantity and quality requirements. Storm sewer, and ditches will convey stormwater runoff to the stormwater management facilities. Ditches and culverts will also convey off-site stormwater from the east to the south to the Summit Avenue right-of-way.

Minimum Maintenance Requirements:

To ensure the proper long-term function of the storm water conveyance practices described above, the following activities must be completed:

1. Grass swales, inlets and outlets must be checked after heavy rains (minimum of annually) for signs of erosion. Any eroding areas must be repaired immediately to prevent premature sediment build-up in the downstream forebays or basin. Erosion matting is recommended for repairing grassed areas.
2. Grass swales shall be preserved to allow free flowing of surface runoff in accordance with approved grading plans. No buildings or other structures are allowed in these areas. No grading or filling is allowed that may interrupt flows in any way.
3. Periodic mowing of the grass swales will encourage vigorous grass cover and allow better inspections for erosion. Waiting until after August 1 will avoid disturbing nesting wildlife. Mowing around the basin may attract nuisance populations of geese to the property and is not necessary or recommended.
4. Any other repair or maintenance needed to ensure the continued function of the storm water practices or as ordered by the City of Waukesha under the provisions listed on page 1 of this Agreement.
5. All outlet pipes, underdrains and other flow control devices must be kept free of debris. Any blockage must be removed immediately.
6. All conveyance pipes and structures must be checked monthly to ensure there is no blockage from floating debris or ice, especially. Any blockage must be removed immediately.
